## OBJECTIVE

I am a Data Science undergraduate with practical experience in data analysis and AI-based projects, including NLP and recommendation systems. With a strong foundation in Python and SQL, I enjoy working with data to uncover insights and develop intelligent solutions to real-world problems. I am seeking an opportunity where I can contribute meaningfully while continuing to grow in a challenging and innovation-driven environment.

---

## EXPERIENCE

### Virtual Internship – IBM PBEL Program

(Project-Based Experiential Learning offered by IBM & NASSCOM)

(June2025-July2025)

- Built and deployed AI-driven solutions as part of IBM & NASSCOM project-based learning program.
  - Designed NLP-powered content generation pipeline using prompt engineering techniques.
  - Improved output relevance and contextual quality of generated responses.
  - Gained hands-on exposure to real-world AI deployment workflows.
- 

## PROJECT

### Hybrid Job Recommender System

(Sept2025- Present)

**Tech Stack:** Python, Flask, TF-IDF, Cosine Similarity, SQLite

- Built a job recommendation system that suggests roles based on a user's skills and job trends.
- Added skill matching and resume parsing to improve job accuracy.
- Developed the web application using Flask with login features and database support.
- Improved recommendations by using similarity matching techniques.

### Social Media Post and Caption Generator

(June2025-July2025)

**Tech Stack:** Python, NLP, Generative AI

- Developed a Generative AI-based Social Media Post & Caption Generator using HuggingFace (Flan-T5).
- Applied prompt engineering and controlled text generation techniques to create platform-specific captions and hashtags.
- Built and deployed an interactive web app using Gradio in a cloud environment.

### MBTI Personality Analysis

(Sept2023-Jan2024)

**Tech Stack:** WordPress, HTML, CSS, PHP

- Built a web-based personality test platform using the MBTI framework.
  - Created an interactive questionnaire that gives users personalized personality insights.
  - Designed a clean and simple interface to make the experience easy and engaging.
- 

## EDUCATION

### B Tech in Computer Science and Engineering (Data Science)

(Augt2023-July2026)

Buddha Institute of Technology, Gorakhpur

### Diploma in Computer Science and Engineering

(2023)

Government Girls Polytechnic, Gorakhpur

### High School, CBSE

(2018)

Little Flower School, GIDA

---

## TECHNICAL SKILLS

**Languages:** Python, SQL

**Machine Learning:** Supervised Learning, NLP, TF-IDF, Cosine Similarity

**Generative AI:** Prompt Engineering, Text Generation

**Frameworks:** Flask

**Databases:** SQLite

**Data Tools:** Power BI, Excel

**Web:** HTML, CSS

**Version Control:** Git
